We have a large water shed area and a lake with earthen dam up stream.

. When we get notification of possible flooding start evacuation of personnel and equipment if

. Notify company Safety department.

. If inundation occurs call MSHA

.Turn off main Electrical Breakers

.Plan for who will stay to monitor site, including multiple shifts.

.Make sure to have water proof clothing and drinking water.

.After water reseeds- assess damage, take photos –notify insurance and company risk dept.

.Start dewatering- permits for discharge may be needed.

.Do not reenergize electrical circuits until they have been checked by Electricians for safe operation.
